R. W. PATTERSON,

he will go to Augusta, Kan. Snowden Bros. operate in Oklahoma under the name of the Lawrence Gas company. Mr. Baldwin is well pleased with his investment at Healdton and he is of the opinion that within two months from now Healdton production will be cared for much better than it is now. He is not discouraged over the present situation.

company and when he leaves here

Wildcat Statistics.

By actual count there are at this ime drilling south of the Canadian river 72 wildcat wells. This number does not include the wells at Allen. which are reckoned as being in proven territory, and does not include the drills at Lawton and at Gotebo. In terest in oil tests is unusual, as these wells indicate. These figures are gathered by actual count. There are not fewer but the probabilities are that there are more. It is not unreasonable to estimate the number of drilling doned its well at a depth of 2,003 feet wells in Oklahoma at this time at 200.

Wildcats Looking Good.

There is an intense interest being manifested now in some wildcat wells in this section of the state. The Oklahoma-Louisiana near Graham in 7-2-2 is looking very good. For several hundred feet the drill has been out of the breaks. No water sands have been found recently and the drill is passing through shale interspersed with oil JURY DELIBERATES Lucillenne Oil Company in section 30-3-10 is drilling at a depth of 2,700 sands. While it is stated that the oil sands will not make a pay well up to date, yet the chances are reasonably good that a new field will be opened at Graham. The well was reported yescompany is spudding in section 9.7-8 terday evening at a total depth of 2,660 feet and drilling

and is moving in tools in section 7-7-5 Another wildcat test being drilled by the Gypsy in 13-2-4 reached a heavy oil sand yesterday at a depth of something like 1,200 feet. The sand was drilled through, it was stated. The oil was heavy, while in the Graham well the oil found is of about 34 gravity.

A rumor also reached here that oil had been found in the Brodie well in at a depth of 400 feet, in the same 9-2-4, but it is probable that the oil came from the shallow sands that had already been penetrated.

Woods Full of Wildcats.

THIRTY SIX MILLION CORDS OF WOOD WASTE ANNUALLY

Washington, June 27.-There are more than 48,000 sawmills in the United States, and their output of waste in the form of sawdust, shav. ings, slabs and other wood refuse is estimated as 36 million cords per year. This is equal to over 4 1-2 billion cubic feet of waste, which is the capacity of a bin one-half mile high with a base covering a forty acre lot. Or, considering each cord to contain eighty feet of solid wood with all the cracks and air spaces taken out, these 36 million cords would make a block of wood more than a quarter of a mile on each edge.

Perhaps one half of this so called waste product is not strictly speaking wasted, but serves a useful purpose as fuel under the boilers. Much of the remaining 18 million cords not only serves no useful purpose, but in most cases is a source of inconvenience and danger, and costs the mill time and Sawmill waste is disposed of in var

ious ways. Some goes to the local fuel market, some to pulp mills or to wood distillation plants. Shavings and hog cuttings, as well as other mill waste, are sometimes used to fill low places in the yard. However, the most common method of getting rid of waste is by burning either in a fire pit having an open fire which some times has a protecting wall on the side towards the mill, or in a burner enclosed on all sides and having a spark arresting screen at the top and that will decide the fate of Paul and a fire grate near the bottom. In both cases some kind of a conveyor is necessary to bear the waste from the mill to the fire. This is usually a sort of trough with a metal bottom, along which a slowly moving chain or cable, equipped with cleats or buckets, carries the waste to the fire.

A closed burner and conveyor costs Judge Watts called the jurors into about \$12,000 for a mill of a hundred the court room at 6 o'clock Monday thousand feet daily capacity. Forty and asked them if they had agreed per cent of the larger mills, cutting upon a verdict. Two men arose as more than 55,000 board feet daily, are foremen and told him that they had equipped with closed burners. Fortyfive per cent have fire pits. The re-No intimation has come from the mainder have neither and dispose of jury room as to how the twelve men their waste in some other way.

It is estimated that for a mill of Ida Hadley sat in the sheriff's office one hundred thousand feet capacity while the jurors deliberated Monday the cost of conveying the waste from afternoon, her knees crossed, one foot the machine where it is made and deswinging freely in the air, and chatted stroying it in a closed burner is 42 cents per cord, or \$10.05 per day, reporter asked what verdict she ex-Burners seldom bring in any revenue. although in a few cases ashes are sold for fertilizer, and in a number husband, Paul Hadley, however, is of others the burner furnishes hot feed water for the boilers.

showing the result of the strain. As Both burners and fire pits add to the hours pass his face grows paler the insurance rates on lumber, and in and he feverishly clutches at his wife's case of the pit on the mill itself. "THE WAR BRIDE"

Kansas City Pastor's Text - Then He Joins Army

Kansas City, Mo., June 26 .- More than 1,500 people crowded into the main auditorium, galleries, anterooms and vestibules of the Linwood Boulevard Christian church last night to hear the farewell sermon of the pastor. Dr. Burris A. Jenkins, chaplain of Third regiment, N. G. M., who will join the regiment at Nevada. Hundreds were unable to get within hearing distance, but many stood on the sidewalk until the service was over waiting for an opportunity to bid him goodby and Godspeed.

Many eyes were wet when the time to say farewell came and Dr. Jenkins was visibly affected by the tenderness of the personal messages from his congregation and other friends, numbers of whom had come from distant parts of the city to hear his parting discourse.

The morning service was similar to the evening. The hearts of many were touched by the eloquent pleas of the pastor at both services and during the day about 100 were added to the membership of the church, several of them being new professions.

"The War Bride" was Dr. Jenkins' heme for the evening service and he likened Christ to the soldier boys who have just marched away, leaving brides and sweethearts behind to carry on their work.

"A few days ago a young captain of militia came to me with his fiance and I married them just before he marched away with his company. Others also marched away, leaving their wives to be cared for by those left behind.

"Jesus Christ went away when His call came, leaving behind Him His bride-the church-to carry on His work. She was His representative and the life He would have lived was to be lived by her."

At the morning service, Dr. Jenkins had for his topic, "The Call to the in the case of pits, especially the open Colors," and it was a splendid discourse, coincidental points in battling for one's country and the church being pointed out with great effectiveness.

> Dr. Jenkins has been granted a six months' leave of absence by his congregation and Dr. Charles Morrison of Chicago will occupy the pulpit during his absence. It is thought Dr. Morrison will be here for next Sunday's
